Certified Theratogs Fitter Labs Levels I & II

**Open only to alumni of Developmental
Orthopedics of the
Trunk and Lower Extremities
Lab Sessions**

July 30, 2018

Enrollment is limited to 18 participants

**Instructor:
Beverly Cusick, PT, MS, NDT**

Location
Pediatric Physical & Occupational Therapy, PLLC
873 Route 45 Suite 107
New City, NY 10956
(Corner of Route 45 and New Hempstead Road)
(Exit 11 off of the Palisades Parkway)
845-362-7787

Certified Theratogs Fitter Labs: Levels I & II

Benefits of Theratogs Fitter Certification:

- 1. Confidence.** TheraTogs are a one-of-a-kind rehab support system. Sometimes even the most experienced clinicians need a little help getting started. Certified TheraTogs Fitters undergo training in the sciences supporting the use of the Posture and Torso Alignment System, and in donning the garments and attaching the strapping included in the system.
- 2. Referrals.** Caretakers and clinicians often ask the staff at TheraTogs, Inc. to find clinicians who understand and use TheraTogs in their practice. Certified TheraTogs Fitters are included in a database that is posted at <http://theratogs.com/clinicians/ctf-locator/>
- 3. Inclusion in product development.** We look to our team of Certified Fitters for help in testing new products and materials (which they may keep after the trials), and seek their input and suggestions.

CTF Level I: Posture & Torso Alignment
CTF Level II: Pediatric Intoeing & Out-toeing

Course Level: Intermediate Level

Target Audience:

Alumni of Developmental Orthopedics of the Trunk & Lower Extremity-didactic program and Lab session.

Course Description

Attendees will be trained in – and experience – the use of TheraTogs garments and strapping strategies for enhancing postural alignment, postural control, and trunk muscle balance in

procedures for enhancing hip stability and for the influencing functioning rotation at the hip and knee joints. Attendees will explain the difference between femoral antetorsion and anteversion and the relevance of this distinction to safe rotation strapping. Certification follows successful completion of the lab sessions and exams for levels I and II.

Option: Instructor will demonstrate strategies for improving resting postures for infants with a Wunzi system and a doll, and will demonstrate Dragonfly TLSO molding on video and apron assembly in person.

Course Objectives

By the end of the lab sessions, participants are expected to be able to demonstrate competence in:

- Donning a TheraTogs Posture and Torso Alignment system that addresses a postural problem specified by Instructor.
- Applying 5 strapping procedures designed to enhance to spinal extension.
- Applying strapping to reduce a pathologic anterior body weight displacement in standing.
- Applying strapping to reduce or increase pelvic anteversion.
- Applying strapping to reduce functioning shoulder girdle protraction and scapular abduction.
- Applying strapping to enhance the load-bearing function of the iliotibial band
- Applying four strapping procedures to reduce excessive functioning hip and leg rotation.
- Explaining the femoral torsion “Green Zone” precaution regarding the use of hip lateral rotation strapping to align the knee axis on the frontal plane.

Program Schedule

PARTICIPANTS BEGIN THE LAB WEARING SNUG-FITTING LAB CLOTHES WITHOUT POCKETS: ELASTIC OR SHORT SHORTS, YOGA PANTS, KNITTED TANK TOP OR SNUG T-SHIRT

Start	Topics
8:00	Sign in/Breakfast
8:30	LAB: Level I: Posture and Torso Alignment Certification - Attendees work in groups of 3.
10:00	Short Break– 15 min
10:15	Resume Lab and complete CTF Level I exam
12:00	Lunch (provided)
1:00	LAB: Level II: Foot Progression Angle Certification– Attendees work in groups of 3. Complete Strapping procedures components of the CTF Level II Exam
2:45	<i>While waiting to getting quizzed, participants pack up trial systems and take a break.</i>
	Verbal quiz: Explain to Instructor the difference between femoral antetorsion & anteversion & the “Green Zone” of safety in rotating strapping.
3:15	Please turn in course evals.
	Optional Demonstrations: Improving Resting Postures in Infants using the Wunzi system and PTA
3:45	Dragonfly TLSO molding (on video) and apron fitting and assembly.
4:30	Adjourn
